### Connection

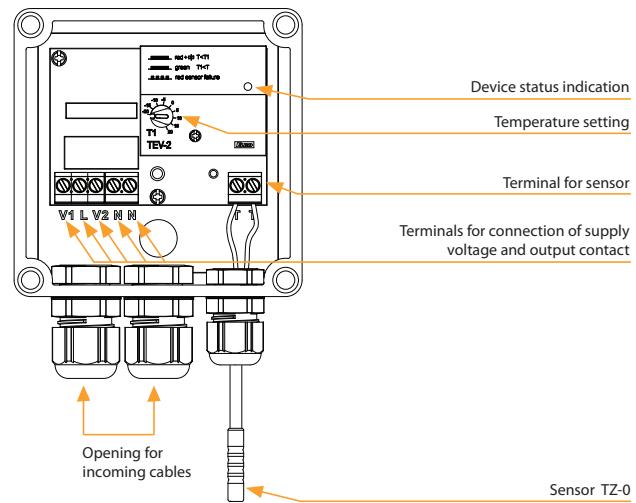

### Symbol

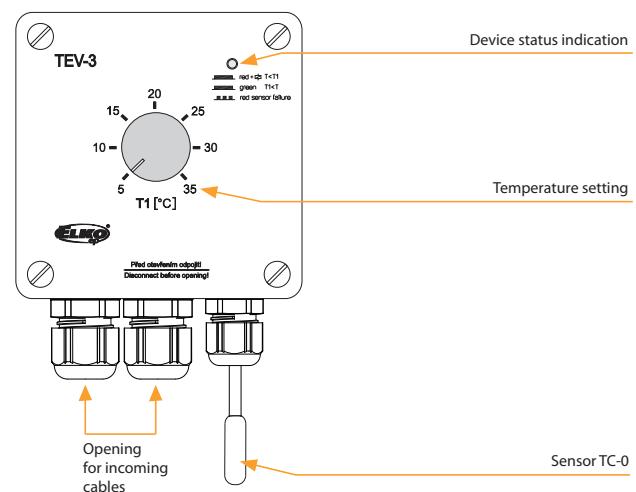

- Single level thermostat with possibility of temperature management in adjustable range.
- Used to regulate heating (or cooling) in demanding spaces (outdoor environment, humidity, dust).
- Thermostat is placed in water-proof box with IP65 protection, which enables installation outside, with in-built sensor.
- TEV-2: control and indication elements are placed under transparent cover.
- TEV-3: control and indication elements are placed directly on the cover (for easy orientation and frequent change of temperature).
- Thermostat status is indicated by two-tone LED.
- Function of monitoring sensor disconnection and short-circuit.

### Description TEV-3 (with cover)

### Function TEV-2, TEV-3

#### Heating function

TEV-2 and TEV-3 are universal single thermostats for universal use. In case ambient temperature is higher than set temperature relay is open (function HEATING). For cooling function (opposite function) is possible to use NC contact of relay (V2).
